

Hokkaido

Grade Conversion

Each university evaluates their students slightly differently. Sometimes there are even differences in terms of credits earned. The following articulation information has been agreed upon by Illinois State University and your study abroad institution.

Grade Conversion

Hokkaido uses the ISU system for grade conversion.

Credit Conversion

Students who successfully complete the Hokkaido summer program will receive 3 credits hours for each course completed:

EAF 228: Social Foundations of Education **and/or**
IDS 133.02: Japanese Culture and Civilization

The process of grade articulation:

At the end of your program, a transcript from your study abroad university will be sent to the Office of International Studies and Programs. Your transcript, together with the Course Placement Request Sheet you completed as part of your application, will be evaluated. You will receive equivalent ISU grades on your transcript which will count toward your GPA. This process can take time. **Please be patient!** If it has been more than two months since the completion of your program and you have not received any grade information, please contact a study abroad advisor.
